Animals

Until the 17th February 2018, the Riva Project presents a group show that brings together works from the Brussels-based Charles Riva Collection and numerous international private collections.

Featuring works by Paul McCarthy, Antoni Corrias, César Crego, Raphael De Vries, Bob Stridde, Roni Horn, Jiri Lankoski, Robert Longo, Jonathan Moore and Richard Jackson, "Animals" explores the representation of Animals in the field of contemporary sculpture. Using a range of techniques and materials, "Animals" brings the animal world to the art world, creating a dialogue surrounding the animal figure and the representation of it.

Ready or for easy, the work by "Animals" contemplates the line drawn between these two worlds and the social connection with the Animal, with both the context of the history of art and general representation.

Here, we present works and installation views from "Animals" at the [Blue Egg](#) - the new exhibition space in Brussels from the [Charles Riva Collection](#).
